Step-by-Step Process

Option 1: Manual Installation Using Installer Interface Prompts

Select and launch an installer application and follow the interface's prompts to complete installation of the PMWE software.

Note: Installation requires access to certain folders and registry files. Tempus highly recommends the installation occur using an elevated administrator credential.

Step	Step Description
1	Tempus will provide a PMWE installer based on the merchant's desire. Ask your Network Administrator to determine the best installer for the deployment. 1. Executable Installer (EXE) 2. Microsoft Software Installer (MSI)
2	Launch the installer, then select **Install PaymentMate.** 1. If **Do you want to run or save**...message displays, select **Run**. 2. If **Do you want to allow the following program to make changes to this computer** message displays, select **Yes**.
3	Installer launches and displays a **Welcome** page. Select **Next**.
4	Read **Important Information** page. Select **Next**.
5	Read **License Agreement** page: 1. Select the **I Agree to these Terms and Conditions** check box. 2. Select **Next.**
6	Read **Installation Options** page: 1. Select/unselect **Create a Desktop Icon for PaymentMate Windows Edition** 2. Select/unselect **Have PaymentMate Windows Edition start when my computer starts**
7	Select **Install.** PMWE installs.
8	**Installation Completed** page displays. i. To start the application, select the **Start PaymentMate Windows Edition when I close Setup** check box. ii. Select **Finish** to close the installer. The next step is Activation. Refer to **PaymentMate Windows Edition (PMWE)-Activating** procedure for activating instructions.

Option 2: Install from Command Prompt

Note: Installation requires access to certain folders and registry files. Tempus highly recommends the installation occur using an elevated administrator credential.

Step	Step Description
1	Add the desired installer file to a C drive folder.
2	Open **Command Prompt** and navigate to the location where the installer resides.
3	Type the desired **Command Prompt Argument** and press **Enter**. See **Command Prompt Arguments** below for options.
4	Installer launches.
5	(If UI Enabled) **Installation Completed** page displays. 1. The next step is Activation. Refer to **PaymentMate Windows Edition (PMWE)- Activating** procedure for activating instructions.

Command Prompt Arguments

Enter one of these arguments in Step 3 above.

Installer Type	Description	Command Prompt Argument
Executable Installer	Run unattended/silent and enable desktop and startup folder shortcuts	**{path to file}\pmlite.exe /install /q**
Executable Installer	Run unattended/silent and disable the creation of the desktop and startup folder shortcuts*	**{path to file}\pmlite.exe /install /q $ShortcutDesktop=2 $ShortcutStartup=2**
Executable Installer	Run installer unattended/silent and disable the creation of the desktop shortcut*	**{path to file}\pmlite.exe /install /q ShortcutDesktop=2**
Executable Installer	Run installer unattended/silent and disable the creation of the startup folder shortcut*	**{path to file}\pmlite.exe /install /q $ShortcutStartup=2**
Microsoft Software Installer	Run installer unattended/silent and enable desktop and startup folder shortcuts	**msiexec /i {path to file}\pmlite.msi /q**
Microsoft Software Installer	Run installer unattended/silent and disable the creation of the desktop and startup folder shortcuts*	**msiexec /i {path to file}\pmlite.msi /q $ShortcutDesktop=2 $ShortcutStartup=2**
Microsoft Software Installer	Run installer unattended/silent and disable the creation of the desktop shortcut*	**msiexec /i C:\pmlite.msi /q $ShortcutDesktop=2**
Microsoft Software Installer	Run installer unattended/silent and disable the creation of the startup folder shortcut*	**msiexec /i {path to file}\pmlite.msi /q $ShortcutStartup=2**

*Installers create desktop and startup folder shortcuts by default. These shortcuts cause PMWE to run when a user logs on. These shortcuts can be disabled using command prompt arguments.

Post Installation Information

After PMWE has successfully been installed:

1. A C:\Spectrum folder path will be created containing:
    a. PaymentMate.exe
    b. Supplementary folders/files required for PMWE to properly be processed.
        i. These files will be read and written to by PMWE, so it is important that both read/write access is given to the application.
2. Registry entries will be created
    a. 32-bit Windows Computer: HKEY_LOCAL_MACHINE\SOFTWARE\ Tempus Technologies\General Attributes
    b. 64-bit Windows Computer: HKEY_LOCAL_MACHINE\SOFTWARE\Wow6432Node\Tempus Technologies\General Attributes
